

Double training in FAMH/PhD in medical microbiology at the Institute of Microbiology in Lausanne

The Institute of Microbiology of the University Hospital (CHUV) of the University of Lausanne (www.CHUV.ch/imul) offers a double training position for motivated individuals with a medical degree. Trainees will obtain (i) the title of specialist FAMH in diagnostic microbiology and (ii) a PhD in microbiology.

This is a competitive 5-year program that includes rotation activities in the various diagnostic laboratories: bacteriology, virology, mycology, parasitology, serology and molecular diagnostics, and a research program that will constitute the basis for a PhD in microbiology.

The Institute of Microbiology provides a rich scientific and academic environment and it is recognized for excellence in clinical microbiology.

This double degree will lead to the possibility to direct activities in an accredited diagnostic laboratory, including the capacity to develop new diagnostic tests, as well as the research profile for an academic career.

We encourage applications from candidates with a completed medical specialty such as internal medicine and /or infectious diseases.

The deadline for submission is January 1st, 2012, for a program starting on June 1st or December 1st, 2012.

The documents (letter of intention, CV, list of publications, copies of degrees, list of 3 persons that can provide a support letter) should be sent to Madame Jocelyne Egloff, Institut de Microbiologie, Bugnon 48, 1011 Lausanne, or by email to jocelyne.egloff@chuv.ch
